WORK EXPERIENCE

DIRO - Internet Original Documents Inc, Delhi - Frontend developer   (2023 - Present)

- Managing the diro.io website with WordPress, handling security issues and integrating Astra vulnerability management.
- Here, I am working as a Frontend Developer. As it is a product based company, I need to enhance the product which is already live to solve the authenication problem for banks, having clients like some renowned US banks.
- Designed, developed, and maintained the Client Portal using React, delivering intuitive user interfaces, integrating robust APIs, and managing Swagger documentation for public-facing APIs to streamline client interactions.
- Created and optimized custom client landing pages tailored to specific business objectives, ensuring alignment with branding and user experience best practices.
- Building a status page to track the health of all projects effectively.
- Implemented advanced SEO strategies, driving a significant increase in website traffic, improving online visibility, and boosting the company's market positioning in competitive digital landscapes

Skills & Tools or Professional Development:

- Utilized cutting-edge AI tools such as GitHub Copilot, ChatGPT, Deepseek, and Cursor Code Editor AI to enhance code quality, streamline debugging, and adhere to industry-leading best practices in frontend development.
- Used AI-based solutions to optimize workflows, improve project management, and accelerate learning of advanced technologies.

PROJECTS

Portfolio Website – https://mamtak16.github.io/Mmt-portfolio/

Client Document Management Portal

- Spearheaded the redesign of a React/Redux portal, cutting document verification time by 60% by integrating real-time updates and intuitive interfaces, thereby increasing user satisfaction scores by 50%.
- Directed a team to implement advanced features, including intuitive interfaces, streamlined workflows, and robust real-time updates, empowering clients with greater control and operational efficiency

Website Management (DIRO)

- Managed the diro.io WordPress site, overseeing page updates, content optimization, and seamless integration of Astra for vulnerability management.
